

INDEX.

- A.
- Abdomen, sudden enlargement of, during pregnancy, 335
- Abstinence for three months, 572
- Air-passages, foreign bodies in, 259
- Albumen, combination of arsenious acid and corrosive sublimate with, 556
- Albuminuria, temporary, 546
—, treatment of, 220
- Alison, connection of recollection of words with anterior lobes of brain, 486
- Alley, laryngitis, 57
- American Medical Society in Paris, 293
- Amputations, are primary or secondary to be preferred? 529
—, circular and flap operations, 13
- Anæmia of pregnant females, 260, 292
- Anæsthetic agents in operations for gunshot wounds, 29
- Andrew, belladonna as a prophylactic in scarlatina, 277
—, poisoning by atropin, 273
- Aneurism, aorta, treatment of, 235
— of bone, 546
—, popliteal, treated by compression, 237
- Aneurisms, treated by compression, table of, 240
- Anus, preternatural, 545
- Aorta, treatment of aneurism of, 235
- Apoplexy, 90
- Arnoldi, nitric acid in asthma, 287
- Arsenite of soda, poisoning by, 553
- Arsenic, esters of, 270
—, ferrate of potash as an antidote to, 560
—, hydrated peroxide of iron and magnesia as antidotes to, 274
— in remittent fever, 349
- Arsenious acid and corrosive sublimate, combination of, with albumen, 556
- Arteries, anomalies of, 83
—, structure of, 217
- Arthritis, dry chronic, 96
- Ascites, recovery after tapping, 348
- Asphyxia, oxygenated water in, 505
- Asthma, nitric acid in, 287
- Atresia ani in the adult, 545
- Atropin, poisoning by, 273
- Aural surgery, contributions to, 31
- Autoplastic treatment of ranula, 254
- Awl's report of Ohio Lunatic Asylum, notice of, 464
- B.
- Bacon, crystals of hematin in the bloody fluid of a tumour, 380
—, urinary deposit of epithelial nuclei, 378
- Baldwin, remedy for intussusception, 563
- Balfour, protection against smallpox afforded by vaccination, 522
- Baron, lateral hermaphroditism, 486
- Bardlett, Fevers of the United States, notice of, 190
- Becquerel and Rodier, influence of chronic diseases upon the composition of blood, 521
- Beer, ale, &c., strychnine in, 551
- Begbie, temporary albuminuria, 514
- Belladonna as a prophylactic in scarlatina, 277
— in pertussis, 353
- Bellingham, dissection of a subject in whom two popliteal aneurisms had been treated by compression, 237
—, treatment of aneurism of aorta, 235
- Benjamin, absence of sternum, 488
- Bennett, function of spleen and lymphatic glands as secretors of blood, 215
—, general treatment of continued fever, 499
—, molecular origin of tissues, 215
—, physiological action of quinine, 491
—, quinine in continued fever, 501
—, treatment of rheumatic pericarditis, 502
- Bernard, action of gastric fluid on stomach, 550
- Bethune, deafness following fever, 338
—, occasional effects of external applications, 345
—, syphilitic disease of the eye, 83
—, sympathetic trouble in ears from disease in eyes, 98
- Bevland on Rachitis, review of, 427
- Biddle, review of *Materia Medica*, 216
- Bigelow, disease of knee-joint, 79
—, dry chronic arthritis, 96
—, fibro-plastic tumour in parotid gland, 338
— of neck, 332
— skin, 338
—, fibrous tumour of uterus, 83
—, fracture of radius, 96
—, fusiform tumour of thigh, 79
—, necrosis of maxillary bones, &c., from fumes of phosphorus, 82
—, osteoid cancer of femur, 80
—, on action of Cochituate water on leaden pipes, 98
—, rare forms of cyst, 90
—, resection of head of femur, 90
—, tumour in the thigh, 82
- Bile, functions of, 437
- Blake, climate and diseases of California, 53

- Blasius, treatment of ununited fractures by application of tincture of iodine, 257
- Blindness of one eye attended with atrophy of optic nerve and optic lobe, 369
- Blood, influence of chronic diseases upon the composition of, 521
- , spontaneous development of gas in, as a cause of sudden death, 224
- Blood-stains, 275
- Boling, new symptom of pneumonia, 278
- Bone in the heart of the boar, 279
- , supposed aneurism of, 546
- Bonnet, absorption of iodine from ulcerated and serous surfaces, 455
- Bowditch, false membrane in croup, 95
- Brainard, enlargement of ethmoidal cells resembling exostosis, 284
- , resection of superior maxillary and malar bones, 131
- , ununited fracture treated by subcutaneous perforation of bone, 253
- Brazil, a review of sketches of, 416
- Brigham, obituary notice of, 468
- Brouks, neuralgia of the scalp, 395
- Brown, new mode of operating for ovarian dropsy, 252
- Brown-Sequard, influence of muscular paralysis on the modification of the blood, 218
- Buboës, opening of, by multiple punctures, 255
- Buckner, mesenteric tumour extirpated, 358
- Burin-Dubuisson, preparations of manganese and iron, 496
- Burns, cicatrices of, 514
- Butcher, chloroform in delirium tremens, 506
- C.
- Cailliant, stethoscopic indication of separation of placenta, 263
- California, climate and diseases of, 53
- Cancer, excision of, 541
- , of breast, 97
- , statistics of, 259
- , treatment of, 540
- Capman, local treatment of ulcers of the legs, 542
- Carinacular inflammation of lip, epidemic of, 528
- Casper, question of pregnancy in putrid bodies, 269
- Castelnau, should white lead as a paint be forbidden? 553
- Cazeaux, chlorosis of pregnancy, 260
- Cazenave, starch in cutaneous diseases, 223
- , treatment of facial neuralgia, 505
- Cell-development, 216
- Cell-organization, 320
- Cerebral disease, cases of, 371
- Channing, sudden enlargement of abdomen during pregnancy, 385
- Chest, Swett on Diseases of, notice of, 165
- Chologogue medicines, action of, 484
- Chloride of palladium a delicate test for iodine, 555
- , sodium in intermittent fever, 101
- Chloroform, alleged death from, 546
- , in delirium tremens, 506
- , in treatment of strictures of the urethra, 250
- Chlorosis of pregnancy, 260, 392
- Christison, quinine in continued fever, 501
- Cicatrices from burns, 514
- Clarke, contributions to aural surgery, 31
- Clavicle, dislocation of, backwards, 258
- Coale, accidental salivation, 369
- , hemorrhage from mouth and anus in a new-born child, 360
- , profuse salivation, 91
- , vaccination, 92
- Cock, cases of cerebral disease, 371
- , surgical operations for retention of urine, 531
- Cod-liver oil, external use of, 287
- , phthisis cured by, 566
- Compression, aneurisms treated by, 237, 240
- Continued fever, general treatment of, 499
- Cooper's Lectures on Surgery, notice of, 194
- , Well, chemical examination of the waters of, 575
- Coronary arteries, ossification of, 78
- Corson, belladonna in pertussis, 353
- Cotting, intussusception, 78
- Cranium, sanguineous tumour of, 567
- Creosote in diarrhœa, 287
- Critical periods, health of women at, 471
- Crouch, parturition in a patient who had undergone ovariectomy, 262
- Croup, false membrane in, 95
- , tracheotomy in, 253
- Cummings, treatment of acute rheumatism by lemon-juice, 397
- Curvature of lower extremities, 339
- D.
- Danyau, rupture of vagina, passage of fatus into abdominal cavity, 262
- Datura, poisoning by, 269
- David, external use of cod-liver oil, 287
- Deafness caused by quinine, 351
- , following fever, 338
- Decidua in an unimpregnated uterus, 80
- Delirium tremens, chloroform in, 506, 508
- Delivery, sudden death after, 267, 268
- Deutsch, atresia ani in adult, 545
- Devergie, rapid cure of itch, 505
- Diabetes, saccharine, 64
- Diarrhœa, creosote in, 287
- , preceding and following labour, 350
- Dislocations, statistics of, 301
- Dorris, extract of red clover in tetter, 288
- Drammond, fibrin in blood of fatus, 218
- , structure of arteries, 217
- Dufour, sanguineous tumour of cranium, 547
- Dumartil, Demarquay, and Lecompte, influence of medicines on temperature of body, 219
- Dundas, Sketches of Brazil, review of, 414
- , treatment of continued fever by quinine, 423, 427, 501
- Durand Fardel, sudden development of gas in the blood as a cause of sudden death, 224
- Durkee, lupus, 89
- , microscopic anatomy of fatus, 346, 251
- Dysentery, iodine clysters in, 222
- Dyson v. Dyson, 276

- E.**
 Eimer, iodine clysters in dysentery, 222
 Ely, poisoning by oil of tansy, 279
 Encephaloid disease of head and face, 341
 peritoneum, 81
 Encysted tubercle of vertebral inter-articular
 fibro-cartilage, 323
 Ergot, easy method of pulverizing and pre-
 serving, 556
 Ergotin, new organic base of, 556
 Erichsen, suicide or homicide, 271
 Erysipelas and scarlatina, relation between,
 512
 Fthmoidal cells, enlargement of, 256
 Eustachian tube, functions of, &c., 481
 Eve, urinary calculus, 41
 External iliac artery, ligature of, 243, 564
 Eye, syphilitic disease of, 83
- F.**
 Facial neuralgia, treatment of, 505
 Fat, digestion and absorption of, 437
 Fats of different regions of the body, 491
 Fellenburg and König, peach-leaf water, 263
 Femur, resection of head of, 90
 Ferrate of potash as an antidote to arsenic,
 560
 Fever, cases of, 84
 Fibrin in blond of fetus, 218
 Fibrinous deposits in interior of heart, effect
 of detachment of, 513
 Fibro-plastic tumour of neck, 332
 Fleury, consequences of congenital phimosis,
 546
 Flügel, fractures of fetal cranium without
 violence, 276
 Fetus, abnormal presentation of, 344
 —, microscopic anatomy of, 346, 351
 Foucard, dislocation of clavicle backwards,
 258
 Foucher, luxation of sacrum, 545
 Foreign bodies in air-passages, 258
 Forget, autoplasmic treatment of ranula, 254
 Fractures of fetal cranium without violence,
 276
 —, statistics of, 301
 Frankford Asylum for Insane reports, 185
 Fricke, saccharine diabetes, 64
 Funis, fatal hemorrhage from, 343, 345
 Furunculoid epidemic, 525
- G.**
 Gairdner, pathological cell-development, 216
 Gall-stones, ulceration of duodenum, fatal
 hemorrhage, 96
 Gardner, cases of operative midwifery, 125
 Gas, spontaneous development in blood, as
 a cause of sudden death, 224
 Gastric fluid, action on stomach, 550
 — juice of jackal, 489
 Gay, encysted tubercle of vertebral inter-arti-
 cular cartilage, 332
 Gibbs, duration and protective power of vac-
 cination, 463
 Giraud, poisoning by datura in Bombay, 269
 Gorp-Besanez, mercury detected in the body
 of a person dying of mercurial cachexy,
 269
 Gould, incisor teeth in a newly-born infant,
 50
- Gould, remedy for nausea and vomiting of
 pregnancy, 348
 Graham's Chemistry, notice of, 213
 Grainger on vaccination, 230
 Greeve, decidua in an unimpregnated uterus,
 80
 Gregory on vaccination, 223
 Grisolle and Dubreuilh, influence of preg-
 nancy and the puerperal state on progress
 of phthisis, 526
 Gross, hermaphroditism, 386
 Guarana, 496
 Guillot, hereditary transmission of phthisis,
 524
 Guthrie on amputations, 529
- H.**
 Hamatodin, crystals of, in the bloody fluid
 of a tumour, 380
 Haidden, hydrated peroxide of iron and mag-
 nesia as antidotes to arsenic, 274
 Hall, neat's-foot oil as a substitute for cod-
 liver oil, 493
 Hardy, rapid cure of itch, 505
 Harelip, early operations for, 576
 Harris, ligature of external iliac artery, 263
 Hassall, blood stains, 275
 Hastings, ligature of external iliac, 564
 Hay fever, 516
 Hayward, ascites, recovery after tapping, 348
 —, deafness caused by quinine, 351
 —, occlusion of vagina, 350
 Hazlehurst, obstruction of rectum from plum-
 stones, 569
 Heart of the bee, bone in, 279
 —, valvular disease of, 334
 Hemierania, treatment of, 505
 Hemorrhagic diathesis, 223
 Hemorrhage from umbilicus in new-born in-
 fants, 310
 — mouth and anus in new-
 born child, 340
 Herapath, infantile phlebitis, 225
 Hereditary transmission of phthisis, 524
 Hermaphroditism, 386
 —, lateral, 486
 Hernia, inguinal, circular arterial distribution
 around the neck of, 253
 Hernia, gradual reduction of long irreduc-
 ible, 253
 Hewson, leucocythemia, 365
 Homans, gall-stones; with ulceration of duo-
 denum, 96
 —, puerperal peritonitis, 95
 Homœopathy, examination of its doctrines,
 191
 Hooker, examination of the doctrines of
 homœopathy, 191
 Hooping-cough, nitric acid in, 287
 Huguier, pregnancy reputed anomalous ter-
 minating naturally, 549
 Hunt, case of impotence, 275
 —, furunculoid epidemic, 525
 Hurxthall, removal of a pessary which had re-
 mained in vagina 41 years, 286
 Hydrated peroxide of iron and magnesia as
 antidotes to arsenic, 274
- I.**
 Impotence, 275

- Indiana Hospital for Insane report, notice of, 466
- Infantile phlebitis, 225
- Inoculation and vaccination, 381
- Insane Hospital Reports, notice of, 174, 462
- Intermittent fever, chloride of sodium in, 101
- cured by large doses of quinine, 221
- Intussusception, 78, 224
- successfully treated, 568
- Iodine, absorption of, from ulcerated and serous surfaces, 495
- , chloride of palladium a delicate test for, 555
- , clysters in the treatment of dysentery, 222
- , prolonged and excessive use, effects of, 495
- Iron and manganese, preparations of, 494
- Ischuria renalis, 390
- Itch, rapid cure of, 505
- J.

UNIVERSITY OF PENNSYLVANIA, MEDICAL DEPARTMENT.
EIGHTY-SEVENTH SESSION (1852-53).

The Lectures will commence in the earlier part of October next, and terminate in the middle of March ensuing.

Theory and Practice of Medicine,	- - -	By GEORGE B. WOOD, M.D.
Anatomy,	- - -	" WILLIAM E. HORNER, M.D.
Materia Medica and Pharmacy,	- - -	" JOSEPH CARSON, M.D.
Chemistry,	- - -	" ROBERT E. ROGERS, M.D.
Surgery,	- - -	" WILLIAM GIBSON, M.D.
Obstetrics and the Diseases of Women and Children,	- - -	" HUGH L. HOBGE, M.D.
Institutes of Medicine,	- - -	" SAMUEL JACKSON, M.D.

Clinical Instruction at the Pennsylvania Hospital, by GEO. B. WOOD, M.D., and by GEO. W. NONNIS, M.D.

Demonstrative Instruction in Medicine and in Surgery by the Professors of the Medical Faculty, assisted by W. W. GERHARD, M.D., and HENRY H. SMITH, M.D.

Practical Anatomy, by JOHN NEILL, M.D., Demonstrator.

J. CARSON, M.D., *Dean of the Medical Faculty,*
332 Walnut Street.

MEDICAL COLLEGE OF OHIO.

SESSION OF 1852-53.

THE THIRTY-THIRD ANNUAL COURSE OF LECTURES will commence on the first Monday of November next, and continue to the end of February, by the following Professors:—

JEDEDIAH COBB, M.D., Anatomy.
JOHN LOCKE, M.D., Chemistry and Pharmacy.
J. LOCKE, M.D., Jr., Adjunct Professor of Chemistry and Pharmacy.
L. M. LAWSON, M.D., Physiology and Pathology.
THOS. O. EDWARDS, M.D., Materia Medica, Therapeutics, and Medical Jurisprudence.
HENRY W. BAXLER, M.D., Surgery and Surgical Anatomy.
LEONOR C. RIVES, M.D., Obstetrics and Diseases of Women and Children.
DANIEL DRAKE, M.D., Theory and Practice, and Clinical Medicine.
WILLIAM H. COBB, M.D., Demonstrator of Anatomy.

The Dissecting-Rooms and the Clinical Amphitheatre of the Commercial Hospital of Ohio, with the Lecture-Rooms of the New College edifice, will be opened on the 1st of October, and preliminary gratuitous lectures will be delivered through that month by different professors.

FEES.—For a Full Course, \$105; Matriculation, \$5; Hospital Ticket, \$5; Demonstrator's Ticket, \$10; Graduation, \$25.

Before graduating, the candidate must have attended two Full Courses of Lectures; the last in this Institution; must have taken the Demonstrator's and the Hospital Ticket once; been in the study of Medicine three years; be twenty-one years of age, and of good moral character.

L. M. LAWSON, *Dean.*

CINCINNATI, O., June 17, 1852.

MARYLAND MEDICAL INSTITUTE.
Baltimore, Md.

The undersigned continue to receive MEDICAL STUDENTS for OFFICE INSTRUCTION. Throughout the year, tri-weekly examinations will be held, which during the Winter will embrace the LECTURES delivered at the Medical Schools.

More particular attention will be paid to *Organic Chemistry, Urinary Pathology, Auscultation and Microscopy.*

DAVID STEWART, M.D.
No. 77 North Eutaw Street.
CHARLES FRICK, M.D.
No. 70 North Charles Street.
FRANCIS DONALDSON, M.D.
No. 36 Franklin Street.

March, 1852.

JEFFERSON MEDICAL COLLEGE.

SESSION OF 1852-53.

The regular Course of Lectures will commence on Monday, the 11th of October, and continue until the first day of March. The ANNUAL COMMENCEMENT for conferring degrees will be held *early in March*, instead of at the end of the month, as formerly.

ROBERT DEVOLISON, M.D., Prof. of Institutes of Medicine, &c.
 ROBERT M. HUSTON, M.D., Prof. of Materia Medica and General Therapeutics.
 JOSEPH PANCOAST, M.D., Prof. of General, Descriptive, and Surgical Anatomy.
 JOHN K. MITCHELL, M.D., Prof. of Practice of Medicine.
 THOMAS D. MÜTTER, M.D., Prof. of Institutes and Practice of Surgery.
 CHARLES D. MEIGS, M.D., Prof. of Obstetrics and Diseases of Women and Children.
 FRANKLIN BACHE, M.D., Prof. of Chemistry.
 ELLERSLIE WALLACE, M.D., Demonstrator of Anatomy.

Every Wednesday and Saturday in the month of October, and during the course, Medical and Surgical cases will be investigated, prescribed for, and lectured on before the class. During the past year, *two thousand and twenty-nine* cases were treated, and *three hundred and eight* operations performed. Amongst these were many major operations—as amputation of the leg, thigh, arm, hand, mamma, &c., trephining, tying the carotid, extensive plastic operations, resection of the femur for ankylosis, removal of the superior and of the inferior maxillary bone, reduction of dislocations—some of old standing—treatment of fractures of the thigh, arm, forearm, &c. &c.

The Lectures are so arranged as to permit the student to attend the Lectures and Clinical demonstrations at the Pennsylvania Hospital.

On and after the 1st of October, the dissecting-rooms will be open, under the direction of the Professor of Anatomy and the Demonstrator.

FEES.

Matriculation, which is paid only once,	-	-	-	-	-	\$5 00
Each Professor, \$15,	-	-	-	-	-	105 00
Graduation,	-	-	-	-	-	30 00

The number of Students during the last session was 506; and of Graduates 228.

R. M. HUSTON, M.D.,

August, 1852.

Dean of the Faculty, No. 1 Girard Street.

NATIONAL MEDICAL COLLEGE—WASHINGTON, D. C.

The Thirty-First Annual Course of Lectures will commence on the first Monday in November, and continue until March.

FACULTY.

THOMAS MILLER, M.D., Professor of Anatomy and Physiology.
 WM. P. JONSTON, M.D., Professor of Obstetrics and the Diseases of Women and Children.

JOSHUA RILEY, M.D., Professor of Materia Medica, Therapeutics, and Hygiene.

JOHN FREN. MAT, M.D., Professor of Principles and Practice of Surgery.

GRAFTON TYLER, M.D., Professor of Pathology and Practice of Medicine.

ROBERT KING STONE, M.D., Professor of Microscopical and Pathological Anatomy.

EDWARD FOREMAN, M.D., Professor of Chemistry and Pharmacy.

JAMES E. MORRIS, M.D., Professor and Demonstrator.

Practical Anatomy may be prosecuted with the most ample facility.

Clinical Instructions given through the entire period of the Lectures at the Washington Infirmary, under the same roof with the College. Here Medicine and Surgery are both taught practically.

The entire expense for a full Course of Lectures is \$95

Practical Anatomy by the Demonstrator 10

Matriculating fee, payable only once 5

Graduation expenses 25

Admission to the Medical and Surgical Clinic without charge.

GRAFTON TYLER, M.D.,

Dean of the Faculty

Office and Residence Corner of Washington and Gay Streets, Georgetown.

MEDICAL DEPARTMENT OF PENNSYLVANIA COLLEGE,
Ninth, below Locust Street, Philadelphia.

The Lectures in this Institution for the Session of 1852-53, will commence on Monday, October 11, and be continued without interruption until the ensuing 1st of March.

The Faculty is constituted as follows:—

Professor of the Principles and Practice of Medicine,	WILLIAM DARRACH, M.D.
Professor of Obstetrics and the Diseases of Women and Children,	JOHN WILTBANK, M.D.
Professor of Materia Medica and Pharmacy,	HENRY S. PATTERSON, M.D.
Professor of the Principles and Practice of Surgery,	DAVID GILBERT, M.D.
Professor of Medical Chemistry, and Pharmacy,	JOHN J. REESE, M.D.
Professor of Anatomy,	JONATHAN M. ALLEN, M.D.
Professor of the Institutes of Medicine,	FRANCIS G. SMITH, M.D.
Demonstrator of Anatomy,	WM. H. GÖBRECHT, M.D.

There is a Medical and Surgical Clinic on every Wednesday and Saturday. Second course students are furnished with a ticket to the Clinical Lectures at the Pennsylvania Hospital, without additional charge.

The Anatomical Rooms will be opened early in September.

FEES.

Matriculation,	-	-	-	-	\$5
Tickets of each chair	-	-	-	-	15
Graduation,	-	-	-	-	30

For further information, address

DAVID GILBERT, M.D., *Registrar*,
 No. 181 North Ninth St., Phila.

COLLEGE OF PHYSICIANS AND SURGEONS OF THE UNIVERSITY OF THE STATE OF NEW YORK.

The Forty-Sixth Session of the College will be commenced on Monday, 11th of October, 1852, and continued until March 10, 1853, (commencement day.)

ALEXANDER H. STEVENS, M.D., LL.D., President of the College and Emeritus Professor of Clinical Surgery.

JOSEPH M. SMITH, M.D., Professor of the Theory and Practice of Medicine and Clinical Medicine.

JOHN TORREY, M.D., LL.D., Professor of Botany and Chemistry.

ROBERT WATTS, M.D., Professor of Anatomy.

WILLARD PARKER, M.D., Professor of the Principles and Practice of Surgery.

CHANDLER R. GILMAN, M.D., Professor of Obstetrics and the Diseases of Women and Children.

ALONZO CLARK, M.D., Professor of Physiology and Pathology (including Microscopy).

ELISHA BARTLETT, M.D., Professor of Materia Medica and Medical Jurisprudence.

CHARLES E. ISAACS, M.D., Demonstrator of Anatomy.

FEES.—Matriculation Fee, \$5; Fees for the full course of Lectures, \$105; Demonstrator's Ticket, \$5; Graduation Fee, \$25; Board, average \$3 per week.

Clinical Instruction is given at the New York Hospital daily, by the Medical Officers, (Professor Smith being one of them.) fee \$8 per annum; at the Bellevue Hospital twice a week, without fee, (Professors Parker and Clark belonging to the Medical Staff;) at the Eye Infirmary, without fee; and upwards of 1000 patients are annually exhibited to the class in the College Clinique. Obstetrical cases and subjects for dissection are abundantly furnished through the respective departments.

The annual Commencement is held at the close of the Session; there is also a semi-Annual Examination on the second Tuesday of September. The pre-requisites for graduation are—21 years of age, three years of study, including two full courses of Lectures, the last of which must have been attended in this College, and the presentation of a Thesis on some subject connected with Medical Science.

In addition to the regular Course, and not interfering with it, a Course of Lectures will be commenced on Monday, 27th September, and continued until the 11th of October.

This course will be free.

R. WATTS, M.D., *Secretary to the Faculty.*

College of Physicians and Surgeons,
 67 Crosby Street, New York. }

MASSACHUSETTS MEDICAL COLLEGE.

THE Medical Lectures of HARVARD UNIVERSITY will commence at the Massachusetts Medical College in Boston, on the first Wednesday in November, and continue four months.

Obstetrics and Medical Jurisprudence by	-	-	WALTER CHANNING, M. D.
Materia Medica and Clinical Medicine by	-	-	JACOB BIGELOW, M. D.
Theory and Practice of Medicine by	-	-	JOHN WARR, M. D.
Pathological Anatomy by	-	-	JOHN B. S. JACKSON, M. D.
Anatomy and Physiology by	-	-	OLIVER W. HOLMES, M. D.
Principles and Operations of Surgery by	-	-	HENRY J. BIGELOW, M. D.
Chemistry by	-	-	J. P. COOKE, A. M.

Clinical Lectures are delivered at the Massachusetts General Hospital three times a week by the Professors of Clinical Medicine and of Surgery. Surgical operations are very numerous, performed weekly in the presence of the class in the operating theatre. The safe and effectual practice of etherization, a discovery first made in Boston, and matured and established in the Massachusetts General Hospital, is practically taught in this School.

Practical Anatomy is amply provided for by the most liberal arrangements. The Anatomical Museum is one of the largest and richest in the United States, and has a fund of \$5000 for its increase. The Eye and Ear Infirmary, and other charities, are open to students.

Fees for the whole Course, \$50. Matriculation, \$3. Dissecting Ticket, \$5. Graduation, \$20. Hospital and Library gratuitous.

April, 1852.

TREMONT STREET MEDICAL SCHOOL, In Boston, over 33 Tremont Row.

THIS School was instituted in Boston, in 1833, for the purpose of giving to private pupils a thorough course of instruction, by lectures and examinations, throughout the year. Two hundred pupils, including a large part of the recent academic graduates of Harvard University, who have devoted themselves to the study of medicine, and many others from all sections of the country, have received their professional education, or some portion of it, at this Institution.

Exercises in the different branches are given daily or oftener, from the close of the University Lectures in March, until their commencement in November, with the exception of the month of August, during which most of the usual labors of the School are suspended. During the session of the University Medical School, examinations are held three times weekly on the subjects of the lectures.

The following gentlemen are instructors in this School, during the present year, in the several departments of medical science, forming a complete and thorough course.

JACOB BIGELOW, M. D.	OLIVER W. HOLMES, M. D.
D. HUMPHREYS STORER, M. D.	HENRY J. BIGELOW, M. D.
J. B. S. JACKSON, M. D.	SAMUEL KNEELAND, M. D.
J. PARSONS COOKE, A. M.	

Practical Anatomy is taught under the immediate direction of the Teacher of Anatomy and Physiology, assisted by the Demonstrator of the Medical School of the University. Ample means of pursuing this important branch of study, and for the practice of the more important surgical operations, are provided without additional expense to the student.

CLINICAL INSTRUCTION.—This essential branch of a medical education is made an object of especial attention. There will be clinical visits at the Massachusetts General Hospital, in the Medical Department, by Drs. Bigelow, Jackson, and Storer, with Lectures at stated intervals; and constant attention to the practical study of Auscultation and Percussion, for which ample opportunities occur in the practice of the Hospital.

Clinical Instruction in Surgery will be given at the same Institution by Dr. Henry J. Bigelow. Ample opportunities are afforded for experience in Obstetric practice.

PUBLIC INSTITUTIONS.—In addition to the medical and surgical practice and operations of the Massachusetts General Hospital, the Students will have admission to the Eye and Ear Infirmary, through the politeness of the Surgeons of that Institution; and also to the Institution for the treatment of Diseases of the Skin, by permission of Dr. Durkee.

MEANS OF ILLUSTRATION.—The large collections of healthy and morbid specimens in the Warren Anatomical Museum, and the Cabinet of the Boston Society for Medical Improvement, will be made available for the purposes of instruction under the direction of Dr. Jackson, the Curator of both these collections. The new and splendid apparatus of Professor Cooke will be employed in practical demonstrations and exercises of the students in Chemistry.

LIBRARY.—During the whole Summer Term, the Students of the Tremont Street Medical School, will have free access to, and the privilege of taking Books from the Library of the Massachusetts Medical College, now consisting of about 1700 volumes, and rapidly increasing by a large annual appropriation, devoted to the purchase of Books most useful and acceptable to the Student.

TERMS.—For the Summer Term (from March 1st to November 1st), \$90. For the Winter Term (from November 1st to March 1st), \$10. For a Year, \$100.

Boston, April, 1852.

UNIVERSITY OF NEW YORK, MEDICAL DEPARTMENT.

Session of 1852-53.

FACULTY OF MEDICINE.

VALENTIN MOTT, M. D., L.L.D., Emeritus Professor of Surgery and Surgical Anatomy, and Ex President of the Faculty.

MARTIN PAINE, M. D., Professor of Materia Medica and Therapeutics.

GUNNING S. BEDFORD, M. D., Professor of Obstetrics, the Diseases of Women and Children, and Clinical Midwifery.

JOHN W. DRAPER, M. D., Professor of Chemistry and Physiology.

ALFRED C. POST, M. D., Professor of the Principles and Operations of Surgery, with Surgical and Pathological Anatomy.

MEREDITH CLYMER, M. D., Professor of the Institutes and Practice of Medicine.

WILLIAM H. VAN BUREN, M. D., Professor of General and Descriptive Anatomy.

WILLIAM DARLING, M. D., Demonstrator of Anatomy.

GEORGE A. PETERS, M. D., Prosecutor to the Professor of Surgery.

ALEX. B. MOTT, M. D., Prosecutor to the Emeritus Professor of Surgery.

JOHN W. DRAPER, M. D., *President of the Faculty.*

COURSE OF INSTRUCTION.—The Courses of Lectures given will be on Anatomy, General, Descriptive, Surgical, and Pathological; Surgery; Materia Medica; Therapeutics; Institutes and Practice of Medicine; Obstetrics and Diseases of Women and Children; Chemistry and Physiology. These Courses are arranged in such a way that six lectures a day are given, except when clinics intervene. The clinics are:

1. *An Obstetric Clinique* every Monday, from 2½ to 4½ o'clock P. M. This clinique was first established by Professor Bedford, in October 1850, and from that time it has met with constantly increasing success. More than 1700 cases of the most interesting diseases of women and children have been presented at it. So great are the facilities of the City of New York in this respect, that it may be truly said, that nowhere else do such opportunities exist for the study of this department.

2. *A Surgical Clinique* every Tuesday from 2½ to 4½ o'clock P. M., under the charge of Professor Mott. All surgical operations which may be necessary, are performed in presence of the Students. The senior students have the privilege of attending the patients at their houses, under the direction of the Professor.

3. *A Medical Clinique* every Wednesday, from 2½ to 4½ P. M., under the charge of Professor Clymer. In this clinique every variety of disease will be brought before the Class, and special attention will be given to maladies of the chest, auscultation, percussion, &c. The patients will be given in charge of the senior Students, to be attended under the direction of the Professor.

4. *A Surgical Clinique* every Saturday, from 10 to 12 o'clock, under the charge of Professor Post. This is conducted in the same manner and upon the same principles as the Tuesday Clinique.

PRACTICAL ANATOMY.—The session during which the dissecting-room will be open for students will occupy five months, commencing the first day of October, and terminating on the first day of March following. During the month of October, the room will be open from 8 o'clock A. M., till 5 o'clock P. M., and it will be the duty of the Demonstrator to attend there regularly during that month, from 10 o'clock A. M., till 1 o'clock P. M., and to devote himself assiduously to the instruction of the pupils in the art of dissecting, and in the acquisition of anatomical knowledge. During the months of November, December, January, and February, the dissecting-room will be open from 8 o'clock A. M., till 10 o'clock P. M.; and it will be the duty of the Demonstrator to be in attendance from half-past 2 o'clock until 4 o'clock, and from half-past 7 o'clock until 10 o'clock, P. M., and to devote himself to the instruction of the dissecting students. The students, on the payment of the fee for the dissecting ticket (five dollars), will be entitled to all privileges of the dissecting-room, and will likewise be furnished with soap and towels for washing. No extra charges will be made them on any account whatever, except for their subjects, and the injection of subjects, and it shall always be optional with the student to have them injected or not.

REGULATIONS FOR THE TERMS OF LECTURES, &c.—**REQUISITES FOR GRADUATION.**—The Lectures commence on Monday, the 18th of October, and are continued upon the last day of February following.

The Examinations for Degrees will commence about the first of March, and will be continued daily, until the candidates shall have been examined.

(CONTINUED ON NEXT PAGE.)

UNIVERSITY OF NEW YORK, MEDICAL DEPARTMENT—CONTINUED.

The following are the requisitions for the Diploma:—

- 1st. The candidate must be 21 years of age.
- 2d. He must have attended two Courses of Medical Lectures; one of which must be delivered in the Medical Department of the University of New York.
- 3d. The Candidate must have studied Medicine for three years (the terms of attending Lectures being included in these), under the direction of a respectable Medical Practitioner.
- 4th. He must write a Medical Thesis, either in the English, Latin, or French language.

Two Commencements take place annually in the University, at either of which Candidates who have complied with the above requisitions may graduate.

The first takes place early in the month of March, and the other about the middle of the month of July. The great body of the Candidates will, no doubt, graduate at the **SPRING COMMENCEMENT**; but those who wish to postpone it will have the opportunity of coming forward in July.

The Examinations for Degrees are conducted in private by the Professors individually.

FEES FOR THE WINTER COURSE:—Full Course of Lectures, \$105; Matriculation Fee, \$5; Practical Anatomy, \$5; Total, \$115.

Students on arriving in town will call at the College in Fourteenth-Street, between Irving Place and Third Avenue, and inquire for the Janitor, Mr. Polman, who will provide them with boarding-houses.

Letters may be addressed to **DR. DRAPER**, President of the Medical Faculty, University, New York.

BALTIMORE COLLEGE OF DENTAL SURGERY.—Session 1852-53.

FACULTY.

CHAPIN A. HARRIS, A. M., M. D., Prof. of Principles and Practice of Dental Surgery.
THOMAS E. BOND, JR., A. M., M. D., Prof. of Special Pathology and Therapeutics.
W. R. HANDY, M. D., Prof. of Anatomy and Physiology.
ALFRED A. BLANDY, M. D., Prof. of Operative Dentistry.
PHILIP H. AUSTEN, M. D., Prof. of Mechanical Dentistry.
REGINALD N. WRIGHT, A. M., M. D., Lecturer on Chemistry.

The Mechanical and Dissecting-rooms, will be opened on the last Monday of October. The Infirmary will be open throughout the year.

The regular Course of Lectures begins on the last Monday of November, and continues till the last of March.

Tickets for the Course, \$110; Dissecting ticket (optional), \$10; Matriculation, \$5; Diploma fee, 30; Total, \$155. Good Bard from \$2 50 to \$3 30.

The Faculty open their next session in a new College, much larger, handsomer, better adapted for all the purposes of Dental Instruction, and situated in a more central part of the city. It contains two spacious and beautiful Lecture-Rooms, an Infirmary, Mechanical, and Dissecting-Rooms. Also a Museum, presenting teeth of every pathological variety, Anatomical Preparations, Plates, and Models, with a large and costly Chemical Apparatus, thus furnishing the most ample means for illustrating the several departments.

W. R. HANDY, Dean.

MEMPHIS MEDICAL COLLEGE.—Session of 1852-53.

ATKES P. MERRILL, M. D., Professor of Materia Medica and Therapeutics.
LEWIS SHANKS, M. D., Professor of Obstetrics and Diseases of Women and Children.
EDWARD H. LEFFINGWELL, M. D., Professor of Chemistry and Toxicology.
HARDY V. WOOTEN, M. D., Professor of Principles and Practice of Medicine.
HOWEL R. ROBARDS, M. D., Professor of Surgery.
ARTHUR K. TAYLOR, M. D., Professor of Anatomy.
CHARLES T. QUINTARD, M. D., Professor of Physiology and Pathology.
DANIEL F. WRIGHT, M. D., Demonstrator of Anatomy.

The regular Course of Lectures will commence on the first Monday in November, and continue four months.

The Class will have free access to the Hospital during the session, when, in addition to the instruction given by the Surgeon, **Dr. George A. Smith**, there will be regular Pathological and Clinical Lectures by the Professors.

The Lecture, Anatomical and all other necessary rooms in the College, are large and comfortable; and arrangements are made to supply the school by the next session, from the collections of Europe and this country, with full Chemical Apparatus, Anatomical Museum, and everything required to demonstrate the different branches. Material for the Practical study of Anatomy is abundant; and special attention is given to that branch.

LEWIS SHANKS, M. D.
Dean of the Faculty.

APRIL 1, 1852.
